AI CUSTOMER ACQUISITION

NEVER MISS A WHATSAPP LEAD AGAIN

Your business can respond while you sleep.

A smart WhatsApp sales and customer-service agent for Nigerian businesses - built to answer questions, qualify enquiries, follow up, and route serious customers to your team.

The follow-up gap is expensive

A customer can message at 1:17am, on a Sunday, or while your sales rep is busy. If the first useful response comes hours later, the customer may already be speaking to someone else.

The agent keeps the process moving until a human needs to step in.

THE AHA MOMENT	
01	Every enquiry gets a first response.
02	Every serious lead gets the right questions.
03	Every important conversation can reach a human.

This is not another basic auto-reply

Basic auto-replies send the same message to everyone. This system uses your approved business information, understands the customer intent, asks useful questions, and follows the next step you define.

It can...	In practice
Customer enquiries	Answers FAQs about products, services, pricing, location, hours, delivery, and policies.
Lead qualification	Asks about need, location, budget, timing, service type, and buying stage.
Appointments and bookings	Collects booking requests or connects to an approved booking system.
Quotes and orders	Gathers the right information before your team prepares a quote or confirms an order.
Voice notes	Understands inbound voice notes and can reply by text or voice, depending on setup.
Follow-up	Reconnects with interested customers using approved WhatsApp templates.
Human escalation	Routes complex, sensitive, or high-value conversations to your team.
Business knowledge	Uses your information so replies sound like your business - not generic internet answers.

You keep the relationship and the final decision. The agent takes care of the repetitive first response and the follow-up work that often gets delayed.

Made for businesses that sell through conversation

The system is strongest where customers ask questions before they buy.

Business	What the conversation can capture
Real estate	Property type, budget, location, timeline, and viewing request.
Beauty, salons and wellness	Service questions, preferred dates, consultation requests, and reminders.
Education and training	Programme information, entry questions, applications, and counsellor calls.
E-commerce and retail	Product questions, order details, delivery guidance, and human support.
Hospitality and events	Dates, group size, packages, availability requests, and booking enquiries.
Automotive and home services	Service need, location, urgency, quote request, and callback.

A typical customer journey

1. A person clicks your advert or sends a WhatsApp message.
2. They receive a helpful response immediately.
3. The agent answers the first questions and asks the right qualifying questions.
4. It sends the next step: booking request, quote request, catalogue, location, or human handoff.
5. Your team receives the important details instead of starting from zero.

Simple, transparent packages

The first figure is the one-time setup fee. The second figure is the monthly management fee. Setup is higher because it covers the thinking, configuration, business knowledge, testing, integrations, and launch - not just switching on a chatbot.

STARTER	GROWTH	SCALE
ONE-TIME SETUP ₦350,000	ONE-TIME SETUP ₦650,000	ONE-TIME SETUP ₦1,200,000+
One core workflow FAQ + qualification + human escalation	Multiple workflows Qualification + booking/follow-up + notifications	Advanced system CRM/API tools + multiple services + reporting
MONTHLY MANAGEMENT ₦150,000	MONTHLY MANAGEMENT ₦250,000	MONTHLY MANAGEMENT ₦450,000+

Setup includes: conversation design, approved business knowledge, lead questions, escalation rules, testing, and launch guidance.

Separate client costs: advertising budget, WhatsApp/Meta message charges where applicable, ElevenLabs or other software subscriptions, and unusual third-party/API costs.

Questions people ask before they start

The price should be judged against the value of keeping your sales process active every day - not against the cost of a simple auto-reply.

What doing nothing can cost you

One missed response is not just one missed chat. It can mean wasted ad spend, lost follow-up, lost trust, and a customer who never tells you why they chose someone else.

WHEN NOTHING CHANGES	WHAT YOU RISK LOSING
You pay to attract the lead but reply too late.	The opportunity your advert created.
The customer repeats their story to another business.	Trust, momentum, and buying intent.
Your team starts from zero when they finally reply.	Time that could have gone into closing and serving customers.

YOUR QUESTION	THE CLEAR ANSWER
Why is setup ₦350,000?	It covers conversation design, business knowledge, qualification, configuration, integrations, testing, and launch. It is not just a monthly software subscription.
Why is there a monthly fee?	The agent needs monitoring, approved updates, knowledge changes, support, and ongoing testing as your business changes.
Is it just an auto-reply?	No. It can understand intent, ask questions, qualify leads, trigger next steps, and escalate to a human.
Can it help me reduce staff costs?	Yes. It can reduce the number of people needed for repetitive first-response work. The agent handles routine questions, qualification, and follow-up, while your team focuses on serious leads, complex cases, and closing sales.
What if it gives a wrong answer?	We use approved facts, clear boundaries, testing, and human escalation. It should not invent prices, policies, or promises.
Can I start small?	Yes. Starter begins with one core workflow, then you can expand after seeing what customers ask most.
Do I own my accounts and information?	Yes. You retain ownership of your business information and client accounts. Never share passwords, OTPs, or API keys in the form.

Ready to stop losing warm enquiries?

If this sounds useful for your business, reply to the message that came with this PDF with:

"START"

We will then send you the separate business information form. It collects your services, prices, FAQs, policies, customer questions, and human escalation details so the agent can respond accurately and in your brand voice.

YOUR NEXT STEP

Reply "START" and we will begin the next stage.
